

# PROFESSIONAL SOFTWARE PROCESSORS FOR MAC & PC

## Master's Bundle

Takes precision mastering to a new level. Includes: • The award winning **L2 Ultramaximizer** for peak limiting and mastering • **Linear Phase Equalizer** provides a more transparent sound to better preserve the musical balance • **Linear Phase Multiband** for mastering on full range mixes.

List price: \$900 Native (Mac & PC)

List price: \$1,800 TDM (Mac only)

**Guaranteed Lowest Price!**

## L2 ULTRAMAXIMIZER Recording, Mixing and Mastering Processor

The **L2 Ultramaximizer** is a totally self-contained processor offering 96kHz sampling rate and a precision digital peak limiter with 48bit resolution. Features include: • Increases perceived sound levels by as much as 18dB • Waves proprietary IDR (Increased Digital Resolution) wordlength-reduction technology with two types of dither and seventh-order noise shaping • Waves Auto Release Control technology for dynamically controlling release times for maximum level with minimum artifact • Two XLR analog I/O • One AES/EBU XLR I/O, one S/PDIF Optical I/O and one S/PDIF Coaxial I/O

• MIDI I/O & thru

List price: \$2395.

## Gold Bundle

Waves most popular bundle. Combines the three processor packages listed below, plus: • **C4 Multiband Parametric Processor** offers four bands each capable of compression, expansion, EQ, or dynamic EQ • **MaxxBass** provides a virtual subwoofer • **PS22**, creates a stereo effect from a mono source.

**Pro FX** includes: • **Engima** modulator • **Doppler** for true stereo pass-by effects • **Ultrapitch** pitch shifter/harmony creator • **MetaFlanger** for classic flange, phase, chorus and true tape flange emulation • **SuperTap** provides multiTap delays with modulation • **MondoMod** supports Amplitude, Frequency, and Rotational Modulation.

**Native Power Pack** or **TDM Bundle** includes: • **L1 Ultramaximizer**, provides maximum level and resolution • **Q10 Paragrophic EQ** • **SuperTap 2-tap**, multiTap delays with modulation • **DeEsser** high frequency dynamic controller • **TrueVerb** virtual room acoustic emulator • **S1 Stereo Imager** offers stereo image tools • **C1 Parametric Compressor**, frequency specific compression.

**Renaissance Collection** includes: • **Renaissance Equalizer**, two to six bands of audiophile quality EQ • **Renaissance Compressor**, recreates the warm sound of classic analog hardware • **Renaissance Reverberator**, classic sound of professional reverb.

List price: \$1,300 Native (Mac and PC)

List price: \$2,600 TDM (Mac only)

## Platinum Bundle

Combines all the processors from the award winning Masters Bundle and Gold bundle, plus the **Renaissance Collection 2** which includes:

• **Renaissance VOX** vocal processor

• **Renaissance Bass** for warm, fat bass tones  
• **Renaissance DeEsser** creates smoother more realistic results

List price: \$2,100 Native (Mac and PC)

List price: \$4,200 TDM (Mac/PC)

## 360° Surround Tools TDM

Finally a complete surround toolkit. Easily achieve localization and enveloping spacialization, 360° of rotation, width, distance panning, reverbation and flexibly linked dynamics. Easily calibrate your studio for surround mixing. List price: \$2,400.

## GET MORE BASS

### Maxxbass 101/102

**MaxxBass** provides a dramatic improvement in bass response and overall audio quality without increasing stress on the speakers or amplifiers.

Waves patented **MaxxBass** technology uses psycho-acoustics to deliver the sensation of lower frequency response without exceeding speaker limits, adding or changing speakers or amplifiers, or increasing power consumption.

**MaxxBass 101** with two balanced XLR and 1/4 TRS I/O. List price: \$350.

**MaxxBass 102** with two unbalanced RCA I/O. List price: \$250.

## t.c. electronic ULTIMATE SOUND MACHINES

### SPARKXL The Realtime Digital Audio Editor for MAC OSX Now with Direct CD Burning!

**SparkXL** is more than a classic two-track editor. A complete mastering and editing environment provides a stack of powerful tools to get the job done, including MEGABITMAX® and audio restoration tools! The impressive realtime De-Noiser and De-Clicker allow users to restore material with tape hiss or click problems.

Features include: • Realtime processing and mastering • Unique browser window • Integrated wave editing • Project file management • Play list • Direct CD burning • VST realtime plug-ins: Compressor/Limiter, Maxlt, Bandpass, Cut Filter, Resonance Filter, Tape Delay, 1 and 3 Band EQ, Expander, TCO-Oscillator, TCF-Filter, TCA-Amplifier, TCSeq-Step Sequencer, TCK-Virtual Keyboard, FuzzSat, Grainalizer, Touch Wah, Sonic Destructor, Sonograph/Metergraph, DeNoiser, DeClicker.

List Price: \$595.

### TC POWERCORE DSP Professional Signal Processor

**TC Powercore DSP** gives the processing power of your computer-based recording system a massive boost, letting you run top quality plug-ins on your system with fewer limitations. If you own Digital Performer, Logic Audio, Nuendo, CuBase, or any other VST/MAS compatible application, the Powercore might be the single most important upgrade you can make this year! Imagine being able to process high-quality plug-ins without worrying that your host processor will run out on you. That's what Powercore does for you. The super-powerful DSP card uses 5 discrete processors: a power PC and 4 Motorola 56K DSPs, which brings the onboard power of the Powercore to an amazing 2.8GHz. It's like having over \$15,000 of world-class reverbs in your computer. A single Powercore is capable of running up to 12 MegaReverbs. Let your host processor manage the operating system, and let Powercore handle your effects processing. Included 96K plug-ins: TC Tools MegaReverb, Chorus/Delay, EQSat, MasterX-3, 24/7C Compressor, ClassicVerb, VoiceStrip, Vintage CL, and Powercore 01 Synth. Spark LE mastering software is also included.

### PowerCore PCI Card

Features include: • Full length PCI card • Works with all I/O cards supported by the host application • System Requirements: PowerMac G3 233(beige) with Mac OS 8.6 or higher or PIII/500 or better with Win98 / Win2000 / ME / XP main board compliant with PCI 2.2 spec and/or 3.3 Volts PCI Bus, 128 MB RAM, VST/MAS compatible application. List price: \$1295.

### PowerCore Firewire

The PowerCore FireWire enables laptop users and professionals constantly on the move to take advantage of the wide selection of professional tools. Complex mixes are possible with just a laptop and one PowerCore FireWire, as it is offering almost twice the power of the PCI-card version!

List price: \$1795.
